## What is Oxycodone?

Oxycodone, also known as a narcotic, is a type of opioid pain medication. It is prescribed to relieve moderate to extreme pain. The extended-release version of Oxycodone is used for continuous pain management and should not be taken as needed for pain relief.

To get instant relief from pain and several other off-label purposes, you may order Oxycodone online.

*Buy Oxycodone online and get up to 10% discount with overnight delivery.*

## More about Oxycodone

Oxycodone is a synthetic opioid pain reliever derived from thebaine and first developed in Germany in 1917. It is a Schedule II controlled substance and **available for sale** with proper prescription by professionals. However, at our internet pharmacy, you don't need a prescription to **buy Oxycodone online**.

The first product containing Oxycodone, Percodan, was approved by the FDA on April 12, 1950.

## Oxycodone tablets identification

Oxycodone is available in different strengths and has unique imprints, shapes, and sizes. Here are a few of them mentioned for easy identification.

- **Shape:** Round

### Strength- Oxycodone 5mg

- **Color-** White
- **Imprint-** M 05 52
- **Shape-** Round

*You may easily order Oxycodone online in the prescribed strength from our internet pharmacy.*

## Warnings and precautions

- Do not take Oxycodone if you have severe asthma or breathing difficulties or if you have a blockage in your stomach or intestines.
- Using opioid medication improperly can lead to addiction, overdose, or even death. Store the medication in a secure place where others cannot access it.
- Using Oxycodone during pregnancy can result in life-threatening withdrawal symptoms in the newborn.

- Do not buy Oxycodone online without medical consultation if you use alcohol or have a past of drug abuse.
- Oxycodone can slow or stop breathing. This risk is higher in elderly or ill patients but can affect anyone using this medication.

To know the complete precaution list, visit the **Adderall coupon**. Also, you can place your order to buy Oxycodone online with the facility of **fast delivery**.

## Before using Oxycodone

To ensure the safety of this medication for you, please inform your doctor if you have a history of the following:

- Head injury, brain tumor, or seizures
- Drug or alcohol addiction or mental illness
- Lung disease
- Thyroid disorder
- Adrenal disease (such as Addison's disease)
- Urination problems
- Problems with your gallbladder or pancreas

Store the drug at room temperature, away from moisture, heat, and light. Keep track of your medication. Oxycodone is a substance of abuse, and you should be vigilant if anyone is using your medication improperly or without a prescription.

## How to take Oxycodone:

Stop using all other continuous opioid pain medications when initiating extended-release Oxycodone. Take it with food for the best results.

Ingest the capsule or tablet whole to prevent the risk of a potentially fatal overdose. Do not chew, crush, break, open, or dissolve.

If unable to swallow a whole capsule, open it and sprinkle the drug into a spoonful of pudding or applesauce. Swallow the mixture immediately without chewing. Do not save it for later use.

Do not crush an oxycodone tablet to inhale the powder or mix it into a liquid for injection.

Measure liquid medication accurately. Use the provided dosing syringe or a medicine dose-measuring device (not a kitchen spoon).

Do not discontinue Oxycodone suddenly. Follow your pharmacist's guidance on slowly reducing your dosage.

Do not keep leftover opioid medication. Even a single dose can be fatal if used accidentally or improperly.

Consult your pharmacist for information on a drug take-back disposal program.

Buy Oxycodone online for details about its intake/consumption.

## Dosage for Oxycodone intake

### Adult dose for pain:

#### **Immediate release:**

Initial Opioid Pain Reliever Dose: Take 5-15 mg by mouth every 4 to 6 hours.

#### **For oxycodone (base) ER capsules:**

The initial dose is 9 mg orally every 12 hours with food.

For details about the dosing guide, visit our website or buy Oxycodone online.

## Adverse effects of Oxycodone

If you experience any signs of an allergic reaction to Oxycodone, like hives, breathing problems, or swelling of the face, seek immediate medical assistance.

Oxycodone, like other opioid medications, slows or stops breathing. If you exhibit signs of slow breathing, blue lips, or difficulty waking up, a caregiver should administer naloxone and seek emergency medical help.

#### **Contact your doctor/pharmacist urgently if you experience any of the following:**

- Noisy or shallow breathing, or breathing that stops during sleep
- Slow heart rate or weak pulse
- Cold, clammy skin
- Seizures

- Symptoms of low cortisol levels

Prolonged use of Oxycodone or other opioid medications may impact fertility in both men and women, although it is uncertain whether these effects are permanent.

To avoid such adverse effects, order Oxycodone online from Adderall Coupon, where you will get original products with detailed information.
