What is Tramadol?

Tramadol is a generic medicine that belongs to the drug class Opioids. It is a potent painkiller under brand names, including Ultram, ConZip, Qdolo, and Ultram ER.

Tramadol is a potent pain reliever prescribed for mild to severe pain that does not respond to other pain medications. The extended-release form of Tramadol is used for ongoing pain management and should not be taken as needed for pain relief.

You can also buy Tramadol online for certain other medicinal purposes that are not listed in this guide.

Order Tramadol online and get the fastest delivery and easy way to treat your pain.

Tramadol pills image

Tramadol is available in various formulations, including immediate-release tablets, extended-release tablets, and capsules. The tablet images of Tramadol can vary depending on the manufacturer and the specific formulation.

It is important for individuals to carefully identify their medication based on the appearance and imprint on the tablet, as different manufacturers may produce tramadol tablets with distinct shapes, colors, and markings.

Strength: Tramadol 50

- **Shape:** Round/Oval/Oval
- **Color:** White

- **Imprint:** AN 627/377/TV 57

Strength: Tramadol 100mg

- **Shape:** Round/Round/Capsule
- **Color:** White
- **Imprint:** L010/531/019

Strength: Tramadol 200mg

- **Shape:** Round
- **Color:** White
- **Imprint:** L011

Tramadol tablets are typically white and shaped like capsules, with a distinctive imprint indicating their strength and brand. Tramadol can be purchased online to help manage both short-term and long-term pain.

You can also order Tramadol online for the best results and overnight delivery.

Warnings and Precautions

- Do not take higher than the recommended dose of Tramadol, as it will increase the chances of seizures. Also, seizure risk is higher in those taking certain antidepressants or opioid medicines.
- You should avoid consuming Tramadol if you have a history of drug addiction.
- Avoid the consumption of Tramadol if you suffer from breathing problems, have an intestinal or stomach blockage, or have used sedatives, narcotic medication, alcohol, tranquilizers, and MAO inhibitors.
- Do not give this medicine to a child younger than 12 or anyone younger than 18 years old who recently had surgery for tonsil or adenoid removal.
- The use of Tramadol during pregnancy can be life-threatening for newborns. Also, do not order Tramadol online if you use it with alcohol or other drugs that can result in slow breathing or drowsiness.

Before taking Tramadol.

Do not consume Tramadol if you are allergic to it or if you have:

- A stomach or bowel obstruction,
- Severe asthma or respiratory issues,
- An obstruction in the stomach or bowel (including paralytic ileus),
- Recent use of alcohol, sedatives, tranquilizers, or narcotic medications, or

Seizures have been reported in some individuals taking Tramadol. Your risk of experiencing seizures may be higher if you have a history of:

- Head injury, epilepsy, or other seizure disorder,
- Substance abuse or alcohol addiction, or
- A metabolic disorder.

To ensure Tramadol is safe for you, inform your physician if you have a history of:

- Respiratory problems,
- Sleep apnea,
- Liver or kidney disease,
- Urination issues,
- Gallbladder, pancreas, or thyroid problems,
- A stomach disorder or
- Mental illness or a history of suicide attempts.

How to consume Tramadol?

- Please discontinue all opioid medications when starting Tramadol. Tramadol can be taken with or without food, but it should be taken the same way each time. Swallow the capsule as a whole to avoid the risk of a potentially severe overdose.
- Do not chew, crush, break, open, or dissolve it. Use the provided syringe or a proper dose-measuring device (not a kitchen spoon) to measure liquid medicine.
- Under no circumstances should a tramadol tablet be crushed or broken for inhalation or mixed into a liquid for injection into a vein, as this has led to fatal consequences.

- If you suddenly stop using Tramadol, you may experience withdrawal symptoms. Consult your physician before discontinuing the medication.
- Store the drug at room temperature, away from moisture and heat. Please keep track of your medicine to ensure it is not being used improperly or without a prescription.
- Do not keep any leftover tramadol. Even a single dose can be fatal if used accidentally or improperly. Ask your pharmacist about a drug take-back disposal program.

Dosing guide

Usual adult dose for pain:

The common starting dose is 50 mg after every 4-6 hours for pain relief.

The maximum recommended dose is 400 mg per day.

The usual dose of Adults for chronic pain:

For individuals 18 years or older who have not taken Tramadol before, the recommended starting dose of extended-release Tramadol is 100 mg taken orally once a day.

The dose can be adjusted in increments of 100 mg every five days until an effective dose with minimal side effects is reached.

The maximum daily dose should be at most 300 mg.

Buy Tramadol online for a complete dosing guide.
